YOUR PROJECT, OUR EXPERIENCE

**Our design and production
experience to enhance your
ideas.**

Manufacturing markets are global,
fast and discontinuous.
To remain competitive, companies must
always be one idea ahead.

Since 1987, TECO is the industrial
partner that develops and realises these

ideas, designing and producing technical
components for fluid systems and
equipment.

We stand out for continuous research
and development, stable processes and
100% testing on every product.

◆ Research & Development

◆ In-house production

◆ Test & Trial

OUR EXPERIENCE AT THE SERVICE OF YOUR PROJECTS

TECO is the choice for those who want to accelerate market launch, reduce development costs and benefit from an already optimised design.

We support the client from the initial idea to the finished product, with an integrated service of research & development, engineering and production.

We collaborate with the main operators in the sector, offering customised industrial supplies

with flexibility, confidentiality and attention to quality.

In close synergy with the client's technical office, we optimise every phase of the process to transform the idea into a reliable, industrialisable and competitive product.

35 YEARS WITH INDUSTRY LEADERS WORLDWIDE PRESENT

Alongside companies, with
innovative, competitive and
tailor-made solutions

Various multinational industry leaders have chosen TECO as a strategic partner to compete globally.

We offer consolidated technical and production expertise to ensure reliable, certified products and materials adapted to each reference market.

Thanks to international experience, we support clients in adapting solutions and processes to local regulations, maintaining high standards of quality and performance.

DIFFERENT SECTORS, CROSS-SECTOR EXPERTISE

Whatever your industrial sector, TECO has the experience of OEM/ODM collaborations, demonstrating the solidity of accumulated design and production expertise.

◆ Pipe and Fittings

◆ Pumps and Pumping Systems

◆ Professional Kitchens

◆ Camping Sector

◆ Water/Gas Utilities

◆ Thermal Generators and Heat Pumps

INDUSTRIAL SUPPLY MODELS

With TECO's OEM and ODM solutions,
flexibility translates into tangible benefits
for your business.

HEAT GENERATORS

Gas boilers

Valves for Gas and Hydrogen

Teco is manufacturer of certified valves for gas and hydrogen with integrated safety devices (*): thermal coupling Firebag[®] excess flow devices GST[®].

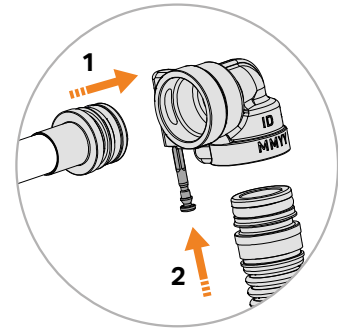

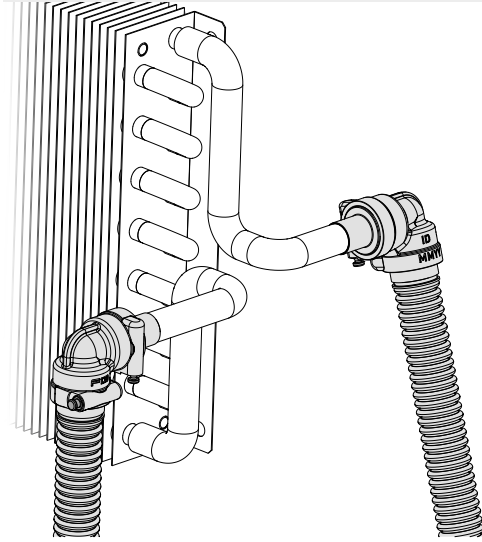

(*) Also available with customised settings.

OEM Components

Components made in co-design with the customer.

HEAT GENERATORS

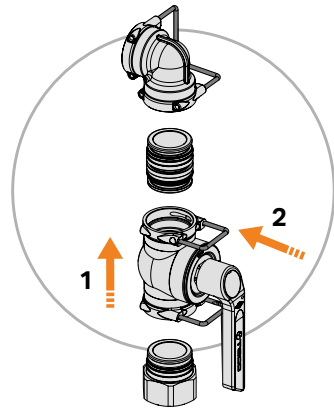

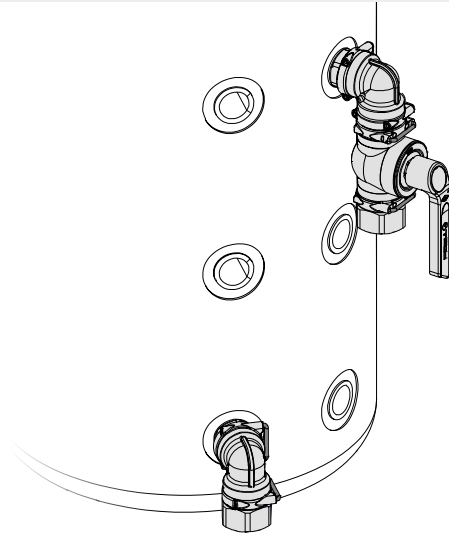

Exchangers

FASTEC® Connection technology

1. Insert the fitting with the pin raised.
2. Lower the locking pin to complete the connection.

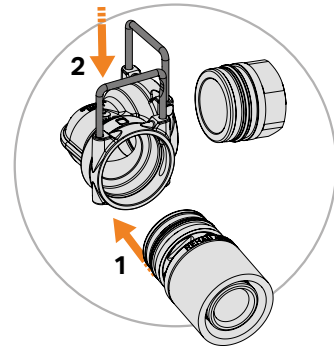

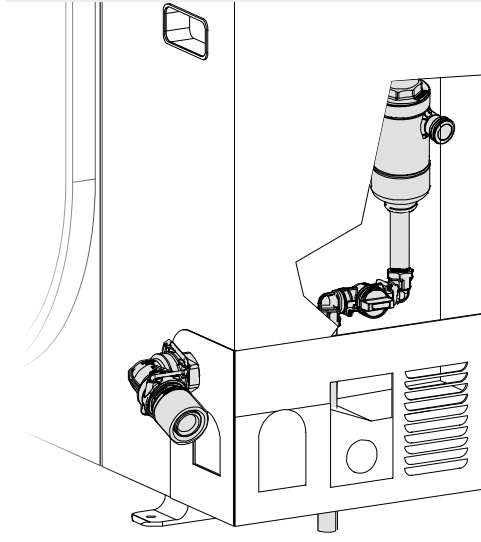

Buffers

Benefits:

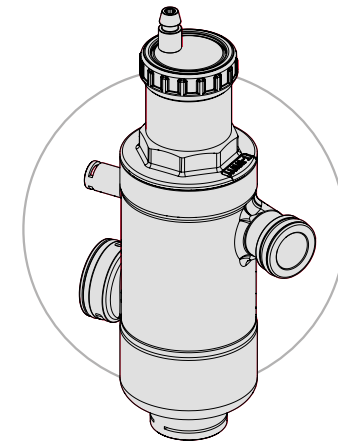

- Compact the space of the internal connections of the devices.
- Allows the installer to connect quickly and conveniently even large diameters, without tools and in confined spaces.

Heat pumps

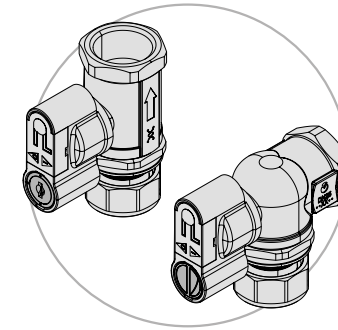

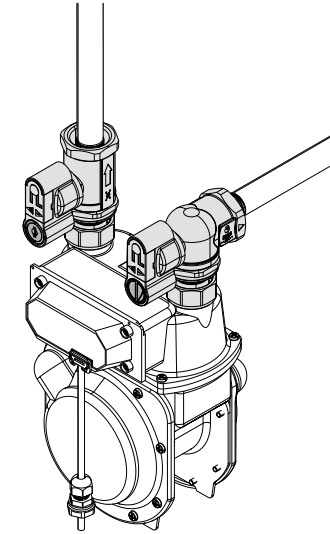

Air/gas separator

Safety devices and venting or heat pumps.

UTILITIES

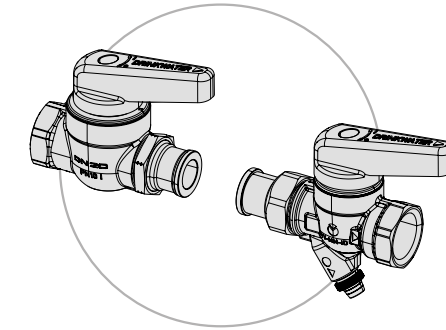

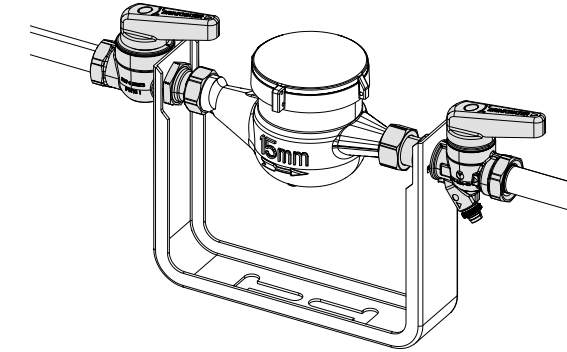

Gas

Valves for Gas and Hydrogen

Production of certified valves for gas and hydrogen with integrated safety devices Firebag® and GST®. The handles and levers can be lockable. Furthermore, the Punto Arancio® pressure tap allows for convenient and quick testing without gas leaks.

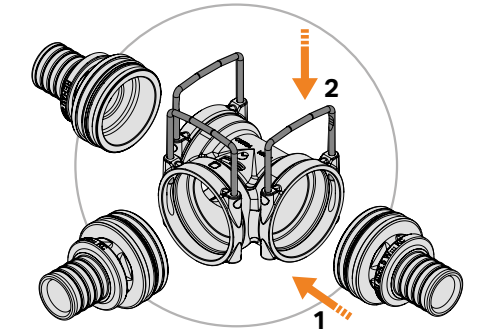

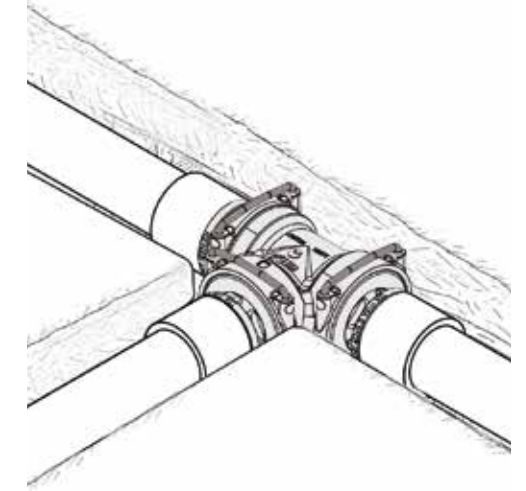

Water

Water valves with anti-jamming ball

Ball Valves with anti-jamming technology Soft-Turn® and lead-free materials already ready for the new drinking water regulations. Possibility to include drainage directly in the valve body.

District heating

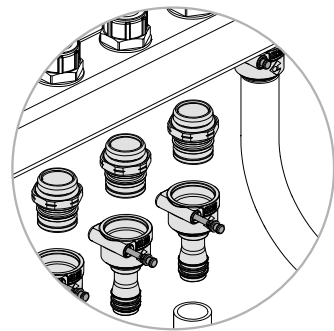

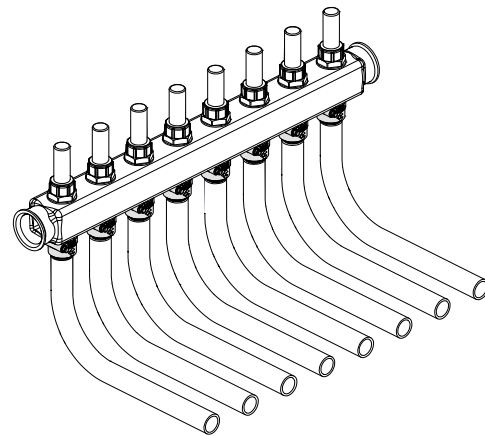

FASTEC® connection technology

Large size FASTEC® fittings allow joints, branches and reductions to be made directly on site without tools and without the need for threading.

PREFABRICATED SYSTEMS

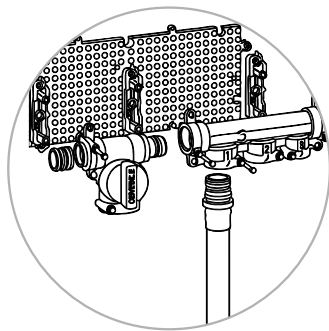

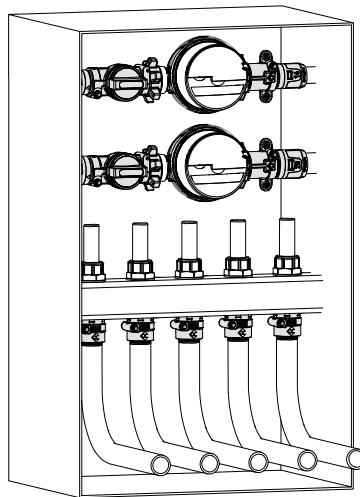

OEM Manifolds

FASTEC® connection technology

The FASTEC® connection applied to underfloor heating/cooling manifolds allows for the creation of compact and easy-to-install manifolds.

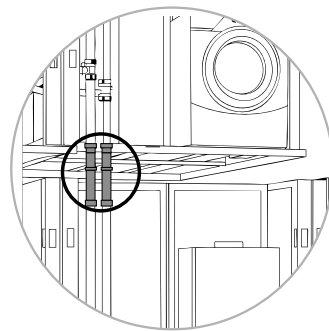

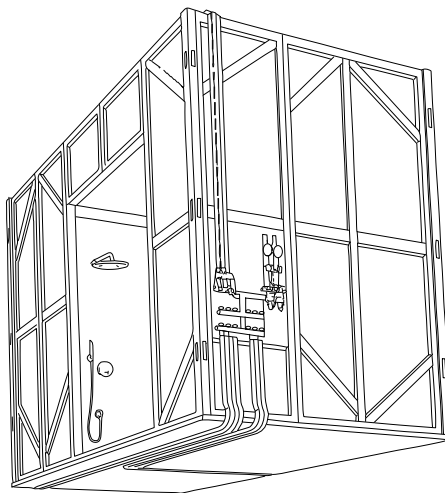

Domestic Stations

Pre-assemblable K-BLOC® Modules

For manufacturers of prefabricated modules and pre-assembled meter boxes, the compact TECO systems allow for easy prefabrication in standard modules and to connect multiple modules in a small space.

Baths and Modules

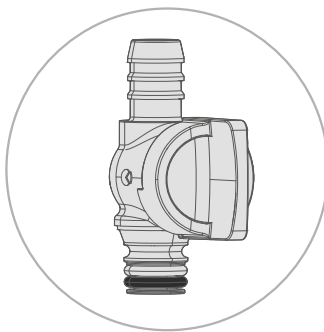

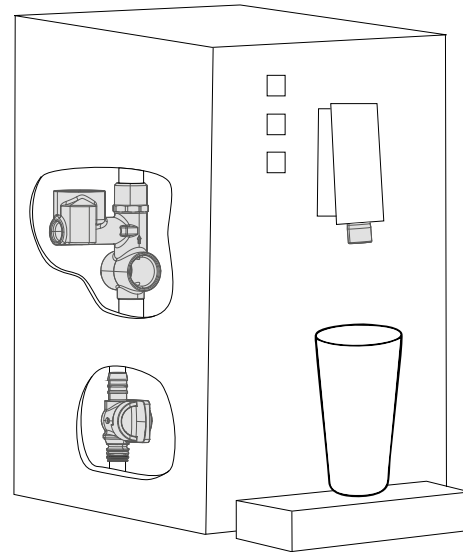

Pre-assemblable modules and telescopic joint

The modular K-BLOC® solutions allow for the creation of bathrooms in series in the factory and without specialised plumbing personnel. Additionally, the FASTEC® telescopic fittings are the ideal solution for connecting the pipes of the modules to each other.

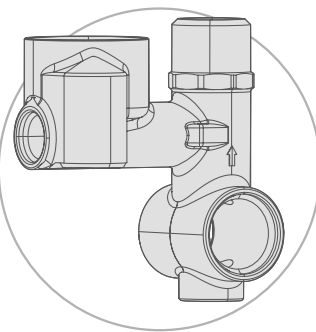

WATER AND SANITARY WARE

Water Dispensers

Ball Valves

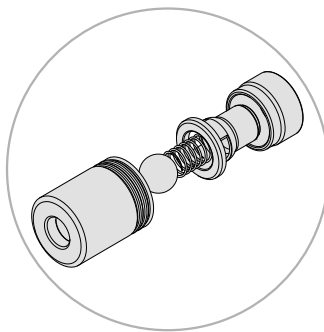

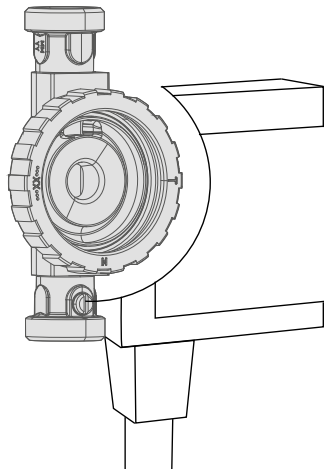

Anti-jamming ball technology suitable for drinking water and specifically machined and moulded for and specific prints for water dispensers.

Moulded and machined

Components made in co-design with the customer and with various finishes, including chrome.

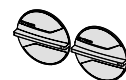

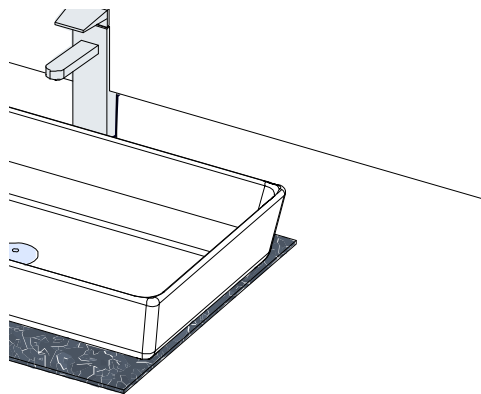

Pumps

Moulded and machined, retainers

Forged and machined custom parts and special check and filter valves for pump manufacturers.

Sanitary ware

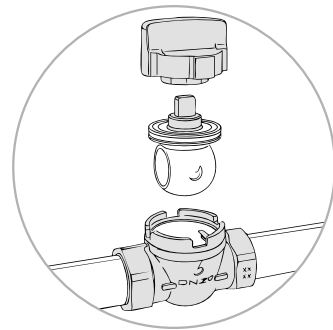

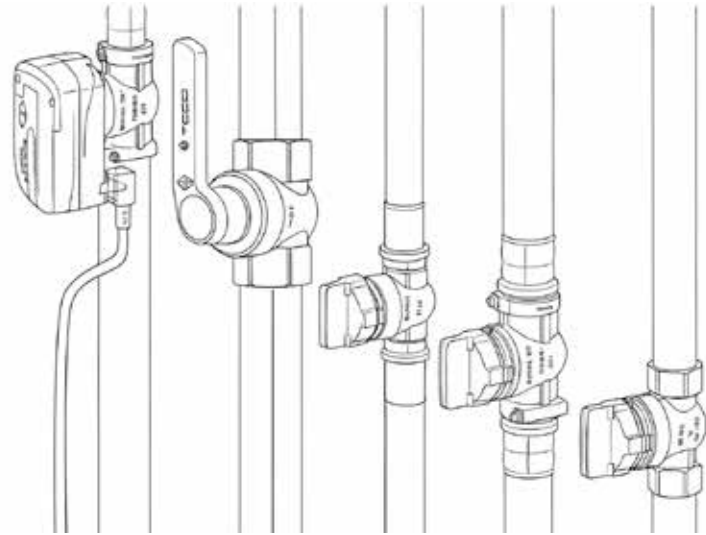

Water valves with anti-jamming ball and aesthetic accessories

Built-in solutions and handle accessories with aesthetics suitable for the most demanding architects, with the possibility to customise your own logo.

PIPES AND FITTINGS

Pipes and fittings

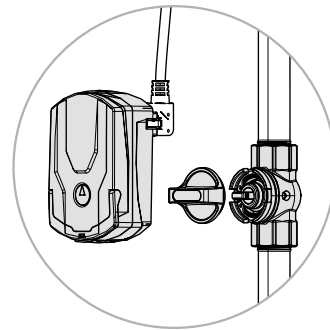

Water valves with anti-jamming ball and valves with optional motor

A wide customizable range of ball valves with Soft-Turn® anti-jamming technology available with customized connections, or with FASTEC® connections. On request, it is possible to integrate the E100 actuator. Once the valve is installed in the system, for maintenance purposes it is possible to remove and replace the ball with the Top-Entry® spare parts.

HOME AUTOMATION

Home automation

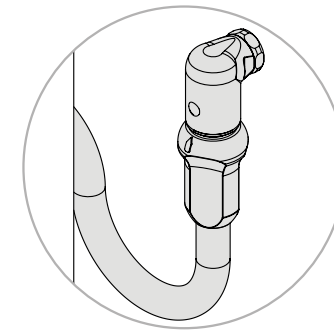

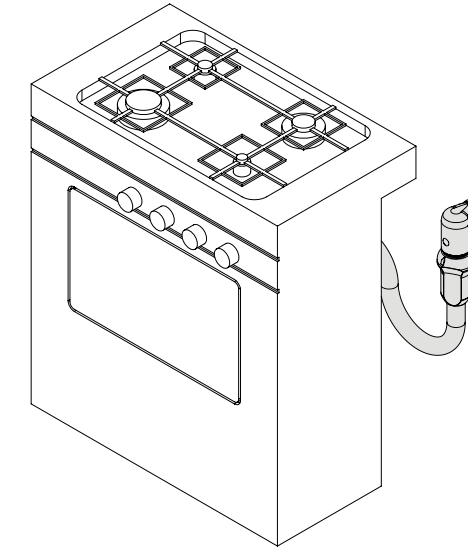

Valves with optional motor with actuator

With the compact E100 actuator applied to TECO ball valves, a home automation system dedicated to drinking water is created. The valve can be actuated remotely by a switch, a hotel card, or a floor leak sensor.

PROFESSIONAL

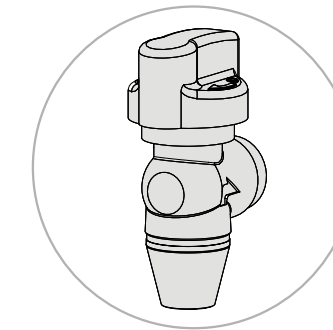

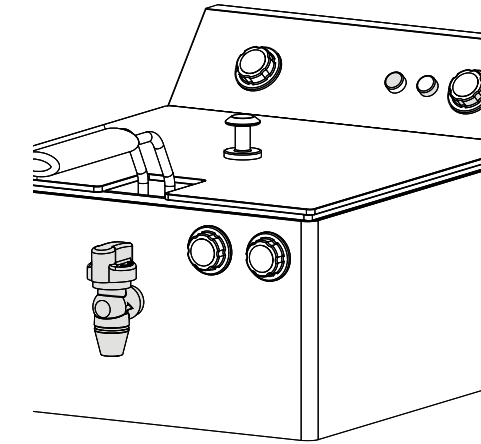

Gas Appliances

Gas valves with bayonet connection

Valves for the Ho.Re.Ca. world with bayonet safety connection and Firebag® thermal device.

Oil Evacuations

Valves for fryers

Oil evacuation valves for fryer appliances.

A FAMILY HISTORY, OVER 35 YEARS OF INNOVATION

TECO is an independent Italian company family-run since 1987 and now in its second generation.

TECO supports and guides the new generations of installers, designers and builders, helping them to bravely face the future challenges of design, installation,

renovation, prefabrication and home automation of systems and devices for fluids.

1987

TECO Srl is founded

Patent for the first removable ball valve

1992

DVGW certification for gas valves and thermal activation devices

1995

Design Plus Award for the Firebag

2000

With K2, the first pre-assembled valve comes to life, paving the way for all TECO modular valves

2008

First patent for FASTEC® rapid connection system

2015

Soft Turn is born, an innovative shut-off ball interception system

2020

EK project, motorised valves

2025

The K-BLOC® manufacturing system is born
